GRAVELLY RIDGE DIVISION

Note: This map was constructed to examine the "Gravelly Ridge Division" of Salisbury land in 1702. The basic skeleton geographically comes from 2 U.S. Geological surveys. They are of different scales because they map 2 different states. However, the scales have been equated by photographic reduction. Obliterated here are some features that are clearly post-1702: The Eastern RR, The Thruway to the beach, etc. The 1857 map of Seabrook was important in knowing what to discard, but does include features which may not have existed 150 years before. Nonetheless, our deciphering of the surveyor's report of the Gravelly Ridge Division suggests that almost all of the features below were already clear in 1702.
